BELL FOUNDRY

THE Subscribers are still manufacturing the best Steel and Brass Bells at one third the cost of the Brass Composition Bells, and warranted to stand for one year. As there are about 1,000 of our home manufactured Bells now in use, some of which have been in use for over seven years, they are well known, and wherever they have been introduced, our patrons will certify that they are cheap, durable, and force of tone, it will ENCOURAGE HOME MANUFACTURE.

I hereby certify that I have known Mrs. Ann Dougherty for the last twenty years, and a woman of probity and truth. I have known her before, during, and since her illness. I have been certified by her friends that she was cheerful, while ill; her case was declared hopeless; and I know that she has recovered, always strong and cheerful. Whatever may be the peculiar properties of this medicine, it is certain, that in her case, it has almost like the performance of a miracle.

NUMBER 21.

A Street Arab.

Ragged the jacket and trousers he wears,
Ragged the shoes on his feet,
For shoes or jacket little he cares.

This Arab of the street,
Picking pocket in the Park
Along with a noisy crew,
Was making a good thing of it.

I wonder whether he has a home,
This street urchin, and how,
He earns the copper he is fond of,
And keeps himself so well.

He is a street urchin, and how,
He earns the copper he is fond of,
And keeps himself so well.

He is a street urchin, and how,
He earns the copper he is fond of,
And keeps himself so well.

He is a street urchin, and how,
He earns the copper he is fond of,
And keeps himself so well.

He is a street urchin, and how,
He earns the copper he is fond of,
And keeps himself so well.

He is a street urchin, and how,
He earns the copper he is fond of,
And keeps himself so well.

Red River News.

We have news from the territory up to the 19th ult., through the Nor'-Wester :

The pontoon bridge across the Assiniboine, near Fort Garry, is now ready for travel.

We understand that the Buffalo are now on their way north, and that immense herds are seeking their usual feeding grounds in this Territory. Report says that they were seven days in crossing the Missouri, and that they are now not far

The town of Winnipeg increases even
under present circumstances. We notice

Eight very respectable buildings in the corner of Second row, whilst a number of the houses in the second row were being destroyed by the fire during the summer. Now that we are in the city, we are glad to be able to point to these our little town upon an appearance worthy of her position.

Mr. R. S. Donaldson is about to start a new business for the purpose of putting the city upon a more solid basis, by bringing in a line of goods, statuary and fancy goods. Our people, as well as our business men, are glad to see this, as they may depend upon finding, in Mr. D.'s new stock everything they may want in his line of business. It is to be hoped that more stores should certainly be encouraged in this line.

The glorious news of the acceptance of the terms of surrender, by the Canadian Government, on the 26th of April, 1891, June, and the late news of the hour preceded any more general demonstration of joy than that which was witnessed between Dr. Schell's and the Fort. The people were all glad to see the Canadian, a beautiful flag, which, raised by Dr. W. H. Brown, and floating from a tower on the hill, was seen by all, and was an appearance such as never before was in this Territory.

Gold Discoveries in New Mexico

The St. John (New Brunswick) Telegraph mentions the discovery of a gold mine near El River. It says:—"The area in which the metal has been found is about as large as the whole gold field in California, and the whole gold field is not contained in such narrow limits. It is situated in the north, on a prairie, and is bounded by R. Thomas, and takes the form of a ledge on the surface of which the quartz contains gold. It is found in the same place, and is visited by gentlemen from Woodstock and Richmond, some of them old Californians, who have been making a very thorough examination. Immediately after a Company was formed, who divided the land into lots, and the gold was discovered, disposed of at the time, realizing about \$100,000; the remaining two being still in the hands of the Company. The gold is found in gold-bearing quartz had been taken from the lead, among them one weighing 200 lbs. and another 100 lbs. The gold is pure gold about the size of a pea. A piece

tion of quartz was subjected to a Raman analysis by Professor Baily of the University, who announced that it contained

All who wish farms with soil of the best kind, and already cleared for the plough. All who have lawless arms and determination to use them. All who lack luck and perseverance. All who have a small capital, say from £100 to £500 and desire to put it to its best use. All who understand the trades of the building in their kinds, such as carpenters, bricklayers, stone masons, plasterers, etc., and cabinet and chair makers, painters, farmers, woolgrowers, cheese makers, and any one understanding the various arts of life, but who find the time hard at home.

Let such come and settle here, and in a few years they will not only be comfortable circumstances, but will be on

WHO SHOULD NOT COME.

Remembering that this is a new and undeveloped country, all who expect to find any comfort there have enjoyed in older countries; all who expect to have their brains exercised by the study of new problems; all who expect to earn the better for one side; all who expect to eat apples before orchards are planted and grown; all who will sigh for advancement and progress before they have the tools it; those who expect to enjoy the fruits of other people's labor; those who are particular as to the title of their cravats and who part their hair in the latest fashion; those who expect to lean to their shoulders to the wheel of progress—all such had better not come. This country is a very large still, we have no room for them at present.

ROUTE TO COME.

The only safe route open for travelers at present is by way of St. Paul, Minnesota, St. Paul, or St. Cloud, Minn., can be reached by railway from any part of Canada.

St. Cloud is 450 miles from this town, and the trail route is 500 miles. The trail route has no interference. There are stage connections between St. Cloud and Point Barlowe, some 280 miles from here. The stage you will have to take a Red River stage, and it will be a long haul. It will be necessary to buy a light wagon in St. Paul, and to come to St. Cloud, and come through by your conveyance. The rig-out will be very useful to you here; but should you wish to go to the Red River, you will have to pay for it. Get your wagon covered, or carry a tent, and prepare your tent to camp out after leaving St. Cloud. You will then find your trip very pleasant, and yourself in robust health when you arrive.

CORR.

The cost of coming from Canada varies with circumstances, parties travelling by company should be able to get here for about \$100. The cost of the trip to the Red River. The railway fare you will be able to ascertain for yourselves, at the depot.

Our land is mostly prairie and is reserved for the pleasure of the people of the State. It is desired by those who have witnessed the life and trouble of clearing off our farms. We have a sufficiency of woods to furnish building and fencing material for some time to come. All you need to do is to clear the woods and your land will not be far from the settlement, (and to be so near to any one else), and to buy your house, fence fields, put in your plow and your claim is established under the Government. The Government of the Dominion is instituted, and the lands surveyed, whilst nobody will be disturbed in his possession, the contiguous lands will be offered at a low price. Remember the large emigration to the West. Also remember the wonderful extent of the territory and reflect upon the improbability of their being any crowding of land during many generations to come.

It would be well if some one would call the attention to the cultivation of the sugar beet, and the manufacture of sugar. A manufactory of woollen goods would be very ready sale for all that they could produce.

Our country is also very rich in coal and iron and other useful minerals and metals and they should be developed by experienced men, which should come.

Stock raising is another thing that will pay for anything but the natural grasses cut for hay.

Agricultural implements find a ready sale here, and a manufactory of reapers, mowers, milking milks, ploughs, harrows, etc., will be successful.

We also need a good tanner or two.

Good cheese is an article almost unknown in the Settlement, and a cheese factory should do a good business in the local market.

THE QUEEN AND MR. PENBOY.

(From the Boston Post.)

It would be difficult for any one to pay a more delicate or graceful compliment than that which Queen Victoria has just paid to our magnificent countryman, George Penboy.

Mr. Penboy, as is well understood, left England very unexpectedly, and without allowing his departure to be known by a narrow circle of friends. But the fact of his embarkation, and of his extreme feeble health, found its way to the English journals, and some came to the knowledge of Her Majesty, who, with that goodness of heart which has always characterized her, and which American people never failed to appreciate and admire, gave immediate expression to her feelings in the following autograph note, which we learn has been received by Mr. Penboy within a few days past, and of which we have been fortunate enough to obtain a copy.

WINDSOR CASTLE, June 29, 1869.

"The Queen is very sorry that Mr. Penboy's sudden departure has made it impossible for her to see him before he left the country, and she is anxious to hear that he is going on well."

"She writes him a line to express her regret that she cannot see him, and to let her personal thanks for all he has done for the people."

"She is sure that Mr. Penboy will be able to get home, and that she may then have the opportunity of seeing him."
